ULTRATAPE ESD TAPES PROTECT ELECTRONIC COMPONENTS

Wilsonville, OREGON February 7, 2018 UltraTape, a division of Delphon and leading supplier of cleanroom tape, custom labels and graphic overlays, offers ESD Tapes to protect electronic components.

Nearly 10% of electronic part failures are due to static charges. Some of these failures arise from insulators such as masking tapes used in manufacturing processes. UltraTape ESD tapes protect static sensitive components from electro static discharge. The tapes comply with the low charging and static dissipative requirements of ANSI/ ESD S20.20, IEC 61340 and JEDEC JESD 625B, produce less than 100 volts with liner removal-and again when removed post process-and include static dissipative top surfaces with surface resistances of $>10^5$ and $<10^9$ Ohms.

~ MORE ~

UltraTape

UltraTape ESD tapes are available in amber and black polyimide plus white and clear polyester and include a variety of PSA thicknesses and low charging, antistatic liners

Background:

Located in Wilsonville, Oregon, UltraTape, a division of Delphon, manufactures high quality cleanroom tapes, labels and graphic overlays for critical environments. The ISO certified company maintains a cleanroom manufacturing facility to assure particle-free and residue-free products that meet even the most stringent standards. UltraTape specializes in material development in order to customize products to meet customer specifications.
