UltraTape Announces 3 Layer Piggyback Label Product

Wilsonville, OR, September 19, 2014 - UltraTape Industries, a division of Delphon and leading manufacturer of cleanroom tape and label products, announced today its new 3 layer cleanroom piggyback label product.

UltraTape's 3 layer piggyback label is made up of 2 top labels plus a base layer label that serves as a backing. The label can be applied to any object and the top two layers can be peeled off and reapplied elsewhere. Piggyback labels are often used for inventory control, asset tracking, and medical applications. UltraTape label products leave no residue and are manufactured from 100% synthetic facestocks, liners, and cores - which prevent particulate contamination issues that arise from coated paper products. The company's team of engineers can design
