UltraTape Newly Trademarked Cleanroom Protocol Tape For Immediate Recognition

Wilsonville, OR, June 8, 2015 - UltraTape Industries, a division of Delphon and leading manufacturer of cleanroom tape and label products, announces its newly trademarked cleanroom Protocol tape (UT1153).

UltraTape's blue and white stripe Protocol Tape was specifically designed for one of the world's largest semiconductor chip manufacturers. The company approached UltraTape looking for a tape with a strong adhesive bond and clean removability that was also designed for cleanroom construction. The tape had to be particle free, residue free and easy to tear by hand. Because the tape was to be used in a critical environment, where contamination was a concern, it was important that employees be able to visually identify the tape as being cleanroom certified. To accommodate this request, UltraTape created

the trademarked blue and white striped Protocol Tape. This unique randomized blue and white strip design gives the customer visual assurance that the specified tape being used is cleanroom certified.

Today, UltraTape's 1153 blue and white stripe Protocol tape is widely used in cleanrooms around the world. The trademarked tape can be used to hang heavy plastic sheeting to create temporary walls, door sealing, taping cart wheels, pipefitting, ductwork, and floor marking.

About UltraTape

Located in Wilsonville, Oregon, UltraTape, a division of Delphon, has manufactured high quality adhesive tapes and labels for critical environments for over 20 years. The company's cleanroom manufacturing facility assures particle-free and residue-free adhesive tapes and labels for controlled environments. UltraTape is committed to on-time delivery and superior quality. Continuous improvement in equipment, facilities, and manufacturing processes allow the company to ensure that each production process meets the customer's specifications as well as ISO quality requirements.
