## Adhesive Tape & Labels for Critical Environments

### Silicone-Free Tape and Labels

#### Cleanroom Ready - Contamination -Free

Protect your cleanroom from contamination with UltraTape's silicone-free solutions. Engineered for quality and precision, these tapes and labels offer clean removal, no residue, and uncompromising performance—manufactured in ISO-certified cleanrooms to ensure your critical environments remain uncompromised.

#### **UT1110SF Polyethylene Medium-High Adhesion**

**Cleanroom Tape** is designed specifically for sealing wafer shipping boxes as well as cleanroom packaging and bag sealing. Its specially formulated medium-high adhesive leaves no residue or ghosting on plastic boxes, even after prolonged storage.

#### **UT1112SF Polyethylene Medium Adhesion Cleanroom**

**Tape** is similar to the 1110/0110 product and is for applications where a medium adhesion tape is preferred. It is suitable for general use in the cleanroom environment.

#### **UT1114SF Polyethylene Low Adhesion Cleanroom Tape**

UltraTape 1114 / 0114 is a low adhesion, removable, highly conformable tape designed for cleanroom packaging and in-process work.

#### **UT1153SF High Tack Polyethylene Construction Tape** and

Trademarked Blue and White Striped Protocol Tape.

UltraTape's high tack tape is ideal for any cleanroom construction application that requires a strong bond. This high adhesion tape is easy to tear, and can be written on with a pen.

#### **UT1154 Polyethylene Medium Adhesion Cleanroom Tape** is

a good alternative for vinyl tape in general use and cleanroom construction. It bonds quickly to all surfaces. Its adhesive strength is virtually identical to vinyl tapes. The polyethylene backing can be written on with a cleanroom pen, and it can be torn by hand.

#### **UT2149 Anti-Static Polyester Film Based Tape** is a specially

constructed self adhesive tape that is based on a polyester film that has been coated with an anti-static primer plus an anti-static pressure sensitive acrylic adhesive layer.

#### **UT6472SF Polyester Medium Adhesion Cleanroom Tape** has

an ultra-thin polyester film backing with green, rubber-based adhesive. It can be used in high temperature applications including temporary holding, masking, flashbreaking with clean release during autoclave processes. The high temperature resistant, non-silicone adhesive makes it ideal for paint masking in liquid powder coat processes.

#### **UT6474SF Polyester Medium Adhesion Cleanroom Tape** is

similar to the 6472/0472 tape and is also ideal for paint masking and other high temperature applications.

Product	Backing	Adhesive	Colors
1110SF	Polyethylene	Acrylic	BL, CL, GR, RE, WH, YE
1112SF	Polyethylene	Acrylic	CL, GR, RE, WH, YE, TB (Tinted Blue)
1114SF	Polyethylene	Acrylic	BL, GR, RE, WH, YE
1153SF	Polyethylene	Acrylic	BK, BL, CL, GR, OR, RE, WH, YE, Blue/White Stripe
1154SF	Polyethylene	Acrylic	White
2149SF	Polyester	Acrylic	Gray
6472SF	Polyester	Rubber	Green
6474SF	Polyester	Rubber	Green
